The Global Wood Export Business

A comprehensive guide to exporting timber and wood products in today's international marketplace

t Experts Global

MARKET OVERVIEW

Why Wood Remains a High-Demand Global Commodity

Wood continues to be one of the most sought-after raw materials across global industries, driven by its versatility, sustainability, and renewable nature. The construction sector relies heavily on timber for structural frameworks and finishing materials, whilst furniture manufacturers value its aesthetic appeal and workability.

The packaging industry has witnessed exponential growth in demand for wooden pallets and crates, particularly with the rise of international logistics. Wood's natural properties—strength, durability, and carbon sequestration—position it as an increasingly attractive alternative to synthetic materials in an environmentally conscious market.

Export Experts Global

Primary Wood Export Categories

Understanding the diverse range of timber products traded internationally

Raw Logs

Unprocessed timber exported for further milling and processing in destination markets

Sawn Timber

Cut and dimensioned lumber ready for construction and manufacturing applications

Plywood & Veneer

Engineered wood products offering strength, flexibility, and decorative finishes

Wooden Handicrafts

Value-added artisanal products including furniture, decorative items, and specialty goods

Export Experts Global

Key International Markets for Wood Imports

China & Asia-Pacific

Dominant importers for construction, furniture manufacturing, and packaging. China alone accounts for nearly 30% of global wood imports, with strong demand for tropical hardwoods and softwood logs.

European Union

Premium markets prioritising sustainably sourced timber. The UK, Germany, and Netherlands show consistent demand for certified wood products, particularly for construction and high-end furniture.

North America

The United States and Canada import specialty hardwoods and value-added products. Focus on architectural timber and exotic species for bespoke applications.

Middle East & Africa

Emerging markets with growing construction sectors. UAE, Saudi Arabia, and South Africa demonstrate increasing appetite for quality timber products.

Market Insight

Asia-Pacific represents over 40% of global wood product imports, with infrastructure development and furniture manufacturing driving sustained growth through 2030.

Export Experts Global

QUALITY STANDARDS

Critical Quality Parameters for Export-Grade Wood

Species Specification

Accurateidentification and documentation of wood species, with preferences varying by market—oak and ash for Europe, teak and mahogany for Asia

Moisture Content

Typically 12-19% for most export markets; kiln-dried timber meeting specific MC requirements prevents warping and degradation

Treatment & Preser vation

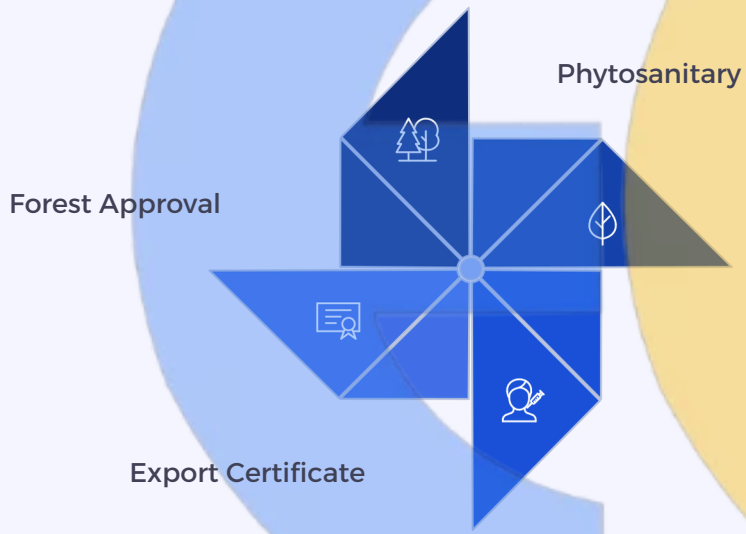
Heat treatmentor chemical preservation against pests, fungi, and decay; ISPM-15 compliance mandatory for packaging materials

Grading Standards

Clear grading classification (Select, #1 Common, #2 Common) based on knots, defects, and appearance for pricing and application suitability

t Experts Global

Navigating Phytosanitary and Regulatory Compliance



This streamlined process ensures wood products meet international plant health standards and prevent pest transmission across borders.

Essential Regulatory Requirements

- **ISPM-15 Standards:** International standards for phytosanitary measures on wood packaging materials, requiring heat treatment or methyl bromide fumigation
- **Phytosanitary Certificates:** Official documents confirming products are free from quarantine pests and diseases **Forest**
- **Clearance:** Government approvals verifying legal harvesting from authorised forest areas **Fumigation Records:**
- Documented evidence of pest control treatments with specified chemicals and exposure periods

Export Experts Global

Sustainability Certifications and Legal Documentation

Meeting international standards for responsible forestry and supply chain transparency

FSCCertification

Forest Stewardship Council certification ensures wood originates from responsibly managed forests. Highly valued in European and North American markets, FSC certification demonstrates environmental stewardship and social responsibility throughout the supply chain.

PEFCRecognition

Programme for the Endorsement of Forest Certification provides an alternative sustainability framework. PEFC certification is particularly recognised in Europe and offers flexibility for smaller forest owners whilst maintaining rigorous environmental standards.

Legal Sourcing Proof

Chain of custody documentation, harvest permits, and legality verification certificates are mandatory. EU Timber Regulation (EUTR) and US Lacey Act require comprehensive documentation proving timber was legally harvested and traded.

Export Experts Global

EXPORT LOGISTICS

Packaging, Fumigation, and Containerisation Standards

Critical Export Preparation

01

Proper Packaging

Secure bundling with steel straps, moisture barriers, and edge protection to prevent transit damage

02

Fumigation Compliance

Heat treatment at56°Cfor30 minutes or methyl bromide fumigation with certified stamps

03

Container Selection

Standard 20ftor 40ft containers with ventilation for moisture control; flat racks for oversized logs

04

Documentation

Packing lists ,fumigation certificates, and container sealing records for customs clearance

Export Experts Global

HS Codes and Export Documentation Requirements

Harmonised System Classification

Accurate HS code classificationis essential for customs clearance and tariff determination. Wood products fall primarily under Chapter 44 of the HS system:

- **4403:** Wood in the rough (logs)
- **4407:** Sawn or chipped wood
- **4412:** Plywood, veneered panels
- **9403:** Wooden furniture

Each subcategory requires specific documentation aligned with the product's species, treatment, and end-use classification.

Essential Export Documents

- Commercial invoice with detailed product specifications
- Packing list and container manifest Bill of lading or
- airway bill
- Certificate of origin
- Phytosanitary certificate
- FSC/PEFC chain of custody documentation
- Export licence (if required)
- Insurance certificate

Export Experts Global

Managing Risks in the Wood Export Business

Key Challenges and Mitigation Strategies

Regulatory Compliance

Navigate complex international regulations through expert consultation and robust documentation systems

Sustainability Verification

Invest in FSC/PEFC certifications and maintain transparent supply chains to meetbuyerrequirements

Quality Consistency

Implement rigorous quality control protocols and third-party inspections beforeshipment

Market Volatility

Diversify buyer base across multiple regions and consider forward contracts tostabilise pricing

Environmental Restrictions

Stayin formed of changing environmental policies and species-specific trade restrictions under CITES

Payment Security

Utilise letters of credit and trade finance instruments to mitigate non-payment risks in international transactions
